## **Procedure for health screen for application of work permit**

All employers applying for a work permit for a third country national has to follow the following procedure.

The employer has to send an email to: [workpermit.meh-health@gov.mt](mailto:workpermit.meh-health@gov.mt) containing the details of employee (Name, Surname, nationality and job being applied for).

They will then receive by email from the Health Department, the appropriate form to be filled in with all the necessary documentation they need to send and all the tests that need to be done according to the job they applied for. Please note some medical checks may take up to 2 weeks for results to be issued. All Health checks are to be carried out in the private sector.

Once all tests are done and results obtained, they have to be scanned and sent to above email address together with a scanned copy of the Health License application form duly filled in and signed.

Some applicants will then be given an appointment to attend Chest Clinic at Qormi health centre for further approval. Others will receive approval form by email.

Please keep in mind that health screen approval once all necessary documentation (medical tests, documentation and form) is received at our end can take up from 3-7 working days. However obtaining all the necessary documentation/health screen results will require a number of weeks.
